VHP Raw Sugar

Brazil's main export: raw sugar for destination refineries.

VHP (Very High Polarisation) is the raw cane sugar Brazil exports most. It is the feedstock for refineries worldwide and is priced against the ICE No. 11 raw sugar futures contract. VHP is shipped in bulk vessels from Brazilian sugar terminals. We offer it on request to refiners with the logistics and banking capacity for vessel-size lots.

PARAMETER	SPECIFICATION
Polarisation	Min. 99.20°
Colour (ICUMSA)	600–1,200 IU
Moisture	Max. 0.15%
Ash (conductivity)	Max. 0.15%
Appearance	Light brown crystal

PACKING

- Bulk

LOGISTICS
